19 July 1954

MEMORANDUM FOR THE RECORD

The following questions were discussed with Deputy Secretary of Defense Anderson at luncheon on 19 July 1954.

25

2. Agreed Activities.

I mentioned this problem but A. said he had not been briefed on it so it was not discussed in any detail.

3. NSA.

A. reported that he was disturbed about this situation and wished to examine with me important steps to bring about improvements. (This point was subject to a detailed oral report to Mr. Sheldon).

4. Space for Indications Center.

He had General Erskine's recommendations and approved them and generally the contents of my letter except that he said that

for technical reasons it might not be possible to put the Center adjacent to one of the secure areas.

5. Military Missions.

I gave him what I thought was a very eloquent presentation of the matter for giving more attention to the personnel of the Military Missions we send abroad; that the time had come when we had to develop military diplomats who could help the government carry out its world-wide obligations. I mentioned the experience we had had with some highly proficient service personnel, particu-

6. He agreed that we should consider the ELINT and related problems but we both felt that there was not time to go into it at the luncheon.

7. Defense and IAC.

He agreed that it was probably desirable that the Defense establishment with its many interests should be represented on IAC. This was in response to my query whether he wanted this. I told him there might be some paper work in accomplishing this, that I would look into it and make a concrete suggestion to him. In this general connection he said he felt it was high time to look into the appropriate distribution of intelligence. I got the impression he was not very well briefed on this subject and probably did not see very much of what we distributed.

9. NATO Documents.

He referred to a letter that General Cabell had written about our access to NATO documents in connection with estimating work and other problems. He suggested that Cabell and Erskine work out a practical solution of this, that it might be difficult to send all NATO documents but that we certainly should get NATO documents with any intelligence connotations.
